DETAILED ACTION

1. This action is responsive to the election filed on 19 December 2002. The Applicant elected the species of Group I in response to the restriction requirement mailed on 19 November 2002. The Applicant indicated that the claims readable on the species of Group I are claims 1, 2, 4, 20, 33-35, 42-44, 54, 55, 57-59, 68, and 71-74. However, claims 71 and 73 are not readable on the species of Group I. Instead, claims 71 and 73 are readable on the species of Group IV. For this reason, the restriction requirement mailed on 19 November 2002 is being repeated in this Office action.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. removing material along the second side of the substrate so that the first and second conductive layers protrude out of the opening, the second conductive layer protruding farther than the first conductive layer (fig. 4B);¹
- II. removing material along the second side of the substrate so that the first conductive layer is recessed into the substrate (fig. 5);
- III. removing material along the second side of the substrate so that the first and second conductive layers are flush with the second side of the substrate (fig. 9); and

¹ This species also includes the following embodiments: removing material along the second side of the substrate wherein the second conductive layer protrudes farther than the insulating layer, and the insulating layer protrudes farther than the first conductive layer.

- IV. removing material along the second side of the substrate so that a third conductive layer protrudes farther than the first and second conductive layers (fig. 16).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 20 is generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toniae M. Thomas whose telephone number is (703) 305-7646. The examiner can normally be reached Monday through Thursday, and alternating Fridays, from 8:30 AM to 5:00 PM.
